#### IV. Surveys of Earnings and Hours

#### I. WAGE RATES INDEXES

- 1. This section contains particulars of weighted average minimum weekly and hourly wage rates for adult males and adult females for Australia and each State, together with index numbers with base: year 1954 = 100. Less detailed statistics are first published in the monthly statement, Wage Rates Indexes (Preliminary) (Reference No. 6.37).
- 2. The wage rates used in the compilation of the indexes are the lowest rates for a full week's work (excluding overtime) prescribed for particular occupations. In the majority of cases the rates are prescribed in awards or determinations of Federal or State industrial authorities or in collective agreements registered with them. Rates prescribed in unregistered collective agreements are used where these are dominant in the particular industries to which they refer.
- 3. The Wage Rates Indexes are based on the occupation structure existing in 1954. Weights for each industry and each occupation were derived from two sample surveys made in that year. The first was the Survey of Awards in April 1954, which showed the number of employees covered by individual awards, determinations and collective agreements, and provided employee weights for each industry as well as a basis for the Survey of Award Occupations made in November 1954. This second survey showed the number of employees in each occupation within selected awards, etc. in the various industries, thereby providing occupation weights.
- The minimum wage rates used in the indexes are for representative occupations within each industry. They have been derived entirely from representative awards, determinations and collective agreements in force at the end of each period commencing with March 1939 for adult males and March 1951 for adult females. The current index for adult males includes rates for 3,415 award designations prescribed in 501 awards, determinations and collective agreements. As some of these designations are operative within more than one industry, or in more than one State, the total number of individual award occupations is 2,313. For adult females the corresponding numbers are 1,100 designations, 187 awards, etc. and 515 individual award occupations. By use of the industry and occupation weights derived from the surveys described above, these rates were combined to give weighted averages for each industry group for each State and Australia. Because of coverage difficulties the rural industry is not included in the indexes. A list of the major awards used in the compilation of the wage rates index for adult males, together with explanatory notes, was shown in the July 1974 and August 1974 issue of this publication. The industry weighting pattern of the indexes is shown on page 80 of Labour Statistics, 1975 (Reference No. 6.61).

- Because the indexes are designed to measure movements in prescribed minimum rates of "wages" as distinct from "salaries", those awards, etc. which relate solely or mainly to salary earners are excluded. Thus awards relating to employees in the Finance and Property industry group (banking insurance, etc.) are excluded as are awards relating to occupations such as engineers, scientists, architects, teachers, nurses, etc. and to administrative employees in government services. Some awards that specify annual rates of pay for certain occupations mainly in government employment (for example, mail officers, postal officers, drivers, linemen, telecommunications technicians, clerks and clerical machine operators, assistants, office typists, telephonists, etc.) are included.
- The rates for particular occupations used in the indexes are prescribed in awards, determinations and collective agreements as set out in paragraph 2 above. Relevant rates of prescribed minimum wages for adult males and adult females (see page 12) are used when applicable. For some occupations general loadings of various kinds are included. Loadings, etc. that are not applicable to all workers in a specified award occupation (for example, those payable because of length of service; working in wet, dirty or confined places; excess fares incurred due to location of building site) are not included in the wage rates indexes. Annual leave loadings, prescribed in many awards, etc., are not included in the wage rates indexes. The ten per cent additions to minimum wage rates for adult males first prescribed in some Western Australian State awards in October 1970 are included in the wage rates. The weekly rates used in the index for occupations specified in the National Building Trades Construction Award include the weekly base rate of pay, the special allowance and the industry allowance.
- 7. In recent years the award rates of pay for some government employees have been based on actual rates of pay for employees in the private sector, which include over-award payments, loadings, etc. Thus award rates of pay for government employees in certain occupations will be higher than those for private employees in comparable occupations. This may affect the relative levels of the weighted average minimum wage rates in industry groups which have a large component of government employees (for example, the Communication group).
- 8. The indexes are designed to measure trends in wage rates in current awards, etc. excluding the effects of changes in the relative importance of industries, awards and occupations. The weighted average wage rates shown in the tables in this section are therefore indexes expressed in money terms, and do not purport to be actual current averages. Similarly, neither these

weighted average wage rates nor the corresponding index numbers measure the relative levels of average current wage rates as between States or industries.

- 9. Since 1954 the industrial structure in Australia has undergone changes which are likely to have had some effects on the representativeness of the regimen of the indexes. These effects are mitigated because occupations in new or expanding industries are often covered by existing awards and the wage rates for new occupations usually conform very closely to those for existing occupations. Also, where an entirely new award has been made and the number of employees affected has warranted such action, occupations from the new award have been introduced into the indexes. These latter cases have not been of great significance.
- 10. Weighted average minimum weekly wage rates for adult males and adult females covered by "Federal awards, etc." and for those covered by "State awards, etc." (as defined below) are shown separately in Tables 3 and 9. The wage rates for these two categories may change at any time as a result of the transfer of particular awards or occupations from one jurisdiction to another.

#### Relevant definitions are as follows:

"Federal awards, etc." include awards of, or collective agreements registered with, the Australian Conciliation and Arbitration Commission and the Coal Industry Tribunal, and determinations of the Australian Public Service Arbitrator.

"State awards, etc." include awards or determinations of, or collective agreements registered with, State industrial tribunals together with certain unregistered collective agreements where these are dominant in the particular industries to which they refer.

- 11. The proportion of employees covered by Federal and State awards, etc. varies considerably between States. In addition, the proportions of employees engaged in the respective industries and occupations differ from State to State. As a result there may be relatively wide differences between the weighted average wage rates in the several States.
- 12. For reasons discussed in paragraph 2, page 13 weekly wage rates for adult males shown in this Section

cannot be compared directly with average earnings figures shown in Section III. The wage rates also cannot be directly compared with the average earnings series mentioned in Section IV for similar reasons.

13. Related publications. Wage rates and index numbers for adult males are available as at the end of each quarter from March 1939 to December 1956 and as at the end of each month from January 1957. Particulars for adult females have been compiled quarterly from March 1951 to June 1967 and monthly from July 1976. For details of wage rates and index numbers from 1939 reference should be made to the following bulletins.

Minimum Wage Rates, March 1939 to June 1965 (Reference No. 6.17)

Wage Rates Indexes, June 1965 to June 1968 (Reference No. 6.21)

Wage Rates Indexes, June 1968 to June 1972 (Reference No. 6.33)

Wage Rates and Earnings, June 1976, (Reference No. 6.16) for final figures July 1972 to June 1975.

Figures subsequent to June 1975 will be found in the July 1976 and later issues of this bulletin, and in the July 1976 and later issues of the monthly statement Wage Rates Indexes (Preliminary) (Reference No. 6.37).

All publications produced by the ABS are listed in *Publications of the Australian Bureau of Statistics* (Reference No. 1.8), which is available free of charge from any ABS office.

- 14. In some cases, when awards etc. are varied, the new wage rates are made retrospective. Also there is generally an unavoidable, and sometimes considerable, delay in the receipt of notification of changes in wage rates in respect of the occupations included in the indexes. Because of these delays, etc., figures for the latest twelve months are subject to revision. As such revisions are made they are published in the normal monthly tables of this bulletin. Considerations of space preclude the publication herein of revised figures for each industry group in each State but these are available on request.
- 15. A table showing the distribution of weekly wage rates included in the wage rates indexes, the weighted averages and medians of the indexes, and the proportion of index weights for wage rates equal to the various minimum wages, for March 1977 was published in the bulletin Wage Rates Indexes, March 1977 (Preliminary) (Reference No. 6.37).

<sup>(</sup>a) See paragraph 8, page 2. Figures for the latest twelve months are subject to revision — see paragraph 14, page 3. (b) For mining, wage rates used are those prescribed for the principal mining centres and include lead bonuses, etc. (c) Includes wage rates (and value of keep) for occupations in the coastal shipping service, other than masters, officers and engineers. (d) Excludes rural industry.

TABLE 2. WEEKLY WAGE RATES: ADULT MALES, ALL GROUPS (a)

<sup>(</sup>a) Excludes rural industry. See paragraph 8, page 2. Figures for the latest twelve months are subject to revision — See paragraph 14, page 3. (b) For definitions, see paragraph 10, page 3. The wage rates for these two categories may change at any time as a result of the transfer of particular awards or occupations from one jurisdiction to another.

TABLE 4. WEEKLY WAGE RATES: ADULT MALES (a), INDUSTRY GROUPS

Weighted average minimum weekly rates payable for a full week's work (excluding overtime), as prescribed in awards, determinations and collective agreements; and index numbers of wage rates.

<sup>(</sup>a) See paragraph 8, page 2. Figures subject to revision — see paragraph 14, page 3. (b) For mining, wage rates used are those prescribed for the principal mining centres and include lead bonuses, etc. (c) Includes wage rates (and value of keep) for occupations in the coastal shipping service, other than masters, officers and engineers. (d) Excludes rural industry.

## TABLE 5. HOURLY WAGE RATES: ADULT MALES (a) INDUSTRY GROUPS, 31 MARCH 1977 (b)

Weighted average minimum hourly rates payable and index numbers of hourly rates.

<sup>(</sup>a) See paragraph 8, page 2. (b) Figures subject to revision — see paragraph 14, page 3. (c) For mining, wage rates used are those prescribed for the principal mining centres and include lead bonuses, etc. (d) Excludes rural industry, and shipping and stevedoring. The former is not included in the Wage Rates Indexes and for the latter definite particulars for the computation of hourly wage rates are not available.

TABLE 6. HOURLY WAGE RATES: ADULT MALES, ALL GROUPS (a)

Weighted average minimum hourly rates payable and index numbers of hourly rates.

<sup>(</sup>a) See paragraph 8, page 2. Excludes rural industry, and shipping and stevedoring. The former is not included in the Wage Rates Indexes and for the latter definite particulars for the computation of hourly wage rates are not available. Figures for the latest twelve months are subject to revision — see paragraph 14, page 3.

TABLE 7. WEEKLY WAGE RATES: ADULT FEMALES (a), INDUSTRY GROUPS, 31 MARCH 1977 (b)

Weighted average minimum weekly rates payable for a full week's work (excluding overtime), as prescribed in awards, determinations and collective agreements; and index numbers of wage rates.

<sup>(</sup>a) See paragraph 8, page 2. Excludes rural industry; mining and quarrying; and building and construction. Figures for the latest twelve months are subject to revision — see paragraph 14, page 3. (b) For definitions, see paragraph 10, page 3. The wage rates for these two categories may change at any time as a result of the transfer of particular awards or occupations from one jurisdiction to another.

TABLE 10. HOURLY WAGE RATES: ADULT FEMALES, INDUSTRY GROUPS, 31 MARCH 1977 (a)
Weighted average minimum hourly rates payable and index numbers of hourly rates.

#### II. BASIC WAGES, MINIMUM WAGES, AND INCREASES IN AWARD TOTAL WAGES

The tables in this section give details of basic wages, minimum wages and increases in award total wages. Information on wage determination in Australia is contained in the Official Year Book. Figures for earlier periods are published in Labour Statistics, 1975 and in earlier issues of this bulletin.

TABLE 12. STATE BASIC WAGES: WEEKLY RATES (\$)

State	Date operative	Adult males	Adult females	State	Date operative	Adult males	Adult females
N.S.W. Victoria Oueensland (c)	(a)24 May 1977  24 May 1977	66.80 (b) 72.70	57.50 (b) 58.50	South Australia Western Australia Tasmania	(a)31 May 1974 24 May 1977	(b) 48.50 69.90	(b) 43.50 69.90

<sup>(</sup>a) Operative from the beginning of the first pay-period commencing on or after the date shown. (b) Basic wage rates no longer operate. (c) Rates shown are operative in the Southern Division — Eastern District (including Brisbane). District allowances are added for other areas – Southern Division (Western District) \$1.05; Mackay Division 90c; Northern Division (Eastern District) \$1.05; and Northern Division (Western District) \$3.25 a week. District allowances for adult female basic wages are 75 per cent of the respective adult male allowances.

TABLE 13. MINIMUM WAGE: WEEKLY RATES (\$) - ADULT MALES AND ADULT FEMALES, FEDERAL AWARDS

Date operative (a)	Sydney	Melbourne	Brisbane	Adelaide	Perth	Hobart	"Six Capital Cities"	Canberra	Darwin (b)

<sup>(</sup>a) Operative from the beginning of the first pay period commencing on or after the date shown. (b) Increase 3 per cent up to a maximum of \$3.80 a week. (c) \$2.50 for wage rates up to \$166 per week. 1.5 per cent for wage rates over \$166 per week. (d) Increase 1.9 per cent up to a maximum of \$3.80 a week.

#### III. AVERAGE WEEKLY EARNINGS PER EMPLOYED MALE UNIT

This section contains estimates of average weekly earnings per employed male unit (see paragraph 8), approximating the average earnings of civilian male employees. Estimates are shown for Australia and each State for each quarter from September quarter 1971, together with financial year averages for the period 1971-72 to 1975-76. Estimates for the Territories are shown for each quarter from December quarter 1973 and for the years 1974-75 and 1975-76.

- 2. All estimates from September quarter 1971 have been revised, as a result of the incorporation of a revised series of employment estimates, changes to the ratio of female to male average earnings and some amendments to the allowance made for earnings from second jobs. The seasonally adjusted series have also been reanalysed. The ratios of female to male average earnings for each quarter from September quarter 1973 are shown in Table 16. No change has been made to ratios for earlier periods.
- 3. For a number of reasons, average weekly earnings in this section of the bulletin cannot be compared directly with the weekly wage rates shown in Section 1. The latter are weighted average minimum award, etc. rates payable to adult male wage earners in non-agricultural industries for a full week's work (excluding overtime), at the end of each month or year. On the other hand the figures in this section represent average weekly earnings for all male wage earners and salaried employees (as defined in paragraphs 4 and 5 below) and are weekly averages over a period of a quarter or a year. The earnings figures reflect changes in the relative importance of different industries and occupations whereas the award, etc. wage rates are compiled in the form of an index with fixed industry and occupation weights.

#### Definition of earnings

- 4. The earnings figures used in the calculation of the averages shown in Tables 17 and 18 comprise award and over-award wages and salaries, the earnings of employees not covered by awards, overtime earnings, bonuses and allowances, commissions, directors' fees and payments made retrospectively or in advance during the quarter. Earnings of part-time as well as full-time employees, and of juniors as well as adults, are included.
- 5. Earnings figures used in calculating the averages shown in Table 19 comprise earnings as defined in the previous paragraph, with the exception of overtime earnings and the earnings of junior employees, part-time employees and managerial, executive, etc., staff.

#### Method of estimation

6. For industries other than agriculture and private domestic service, particulars of employment and wages and salaries are derived from payroll tax returns and from direct returns from government and other bodies. These returns account for approximately 90 per cent of wage and salary earners in these industries, as published

monthly in the bulletin Employment and Unemployment (Reference No. 6.4). Estimates are made for the unrecorded balance in terms of both numbers and earnings. The level of average earnings estimated for the unrecorded sector is approximately 80 per cent of the level shown by the direct returns. For agriculture and private domestic service, employment and earnings are estimated from other sources and are included in the calculations.

7. For employees reported on more than one payroll, all reported wage and salary earnings are included in calculation of the averages.

#### Male units

Particulars of wages and salaries paid are not 8. available for males and females separately from the sources used for this series; average weekly earnings have therefore been calculated in terms of male units, i.e. total male employees plus a proportion of female employees, the proportion being derived from the estimated ratio of female to male average earnings. Different ratios of female to male average earnings are used for individual States, based on information from surveys of weekly earnings and hours, conducted in May and October, a survey of weekly earnings, conducted in August, and other sources. Ratios used are shown in the table on page 14. The Australian ratio is the weighted average of the State and Territory ratios. Changes in these ratios may be necessary from one quarter to the next to reflect, for example, the extension of equal pay provisions, or appreciable and sustained changes in the levels of male overtime earnings. However, small differences in these ratios have relatively little effect on the earnings figures; if the ratio is understated by one per cent then average weekly earnings of \$190 would be overstated by about 70 cents.

#### Seasonally adjusted estimates

Quarterly figures are affected by seasonal influences. For example, special payments, including prepayment for holiday periods, tend to raise the December quarter and to depress the March quarter averages. In addition, figures are affected by the varying number of pay-days in different quarters, (with the exception of Australian Government pay-days in the Northern Territory and the Australian Capital Territory, for which special adjustments have been made in the original series). Allowance for these variations, and for recurring seasonal influences, has been made in calculating the seasonally adjusted estimates for all series shown in the tables. The seasonal adjustment factors were derived from a series from which the influence of major changes in awards and determinations and estimates of the effects of pay-day variations had first been removed. While the seasonally adjusted series retain the effect of the major award, etc. changes, the pay-day effect is excluded. A detailed description of the methods of seasonal adjustment is given in Seasonally Adjusted Indicators (Reference No. 1.10).

#### IV. SURVEYS OF EARNINGS AND HOURS

General — Since 1960 a number of statistical surveys of wages and hours of work in Australia have been conducted. Each of these surveys is listed below and reference made to the publications containing detailed results. As these surveys were based on samples, the resultant estimates are subject to sampling variability, that is variations which might occur by chance because only a sample of employers was surveyed. In addition to affecting the results of each sample survey, sampling variability also affects comparison between each year's survey results.

Survey of Wage Rates and Earnings, September 1960 – For results of this survey of marginal rates of wages and actual weekly earnings of full-time adult male employees see *Labour Report No. 50*, 1962 and 1963 (pages 80-83).

Survey of Weekly Earnings, October 1961 — Results of this survey about the distribution of actual weekly earnings of full-time adult males were published in Labour Report No. 50, 1962 and 1963 (pages 83-86).

Survey of Weekly Earnings, October 1965 — This survey obtained average weekly earnings for full-time adult and junior males in private and government employment; and for full-time adult males, the distribution and composition of earnings. For detailed results see *Labour Report No. 53*, 1967 (pages 80-96).

Survey of Weekly Earnings (Size Distribution), May 1971 — The survey obtained, for private and government employees, estimates of the distribution of earnings of full-time adult male employees (paid for a full week) and particulars of average weekly overtime earnings and average weekly ordinary time earnings. Separate details were obtained for (a) male managerial, executive, professional and higher supervisory staff, and (b) other full-time adult male employees. For detailed results see Labour Report No. 56, 1971 (pages 117-170).

Survey of Weekly Earnings and Hours, October 1962 to 1964, 1966 to 1976.

(i) Surveys to 1972 (private employees). Sample

surveys in respect of most private employees subject to payroll tax conducted for the last pay-period in October. Detailed results, explanatory notes, etc. of these surveys were published in Labour Report No. 56, 1971 and Labour Report No. 57, 1972. The estimates shown in these Labour Reports (and in earlier issues) are not directly comparable with those published in the bulletins (Reference Nos. 6.36 and 6.40) – see below.

(ii) The 1972 to 1976 surveys (private and government employees). From October 1972 coverage was expanded to include (i) private employees in the Northern Territory and the Australia Capital Territory, (ii) employees in non-government hospitals not subject to payroll tax and (iii) employees of Australian, State and local government authorities. Detailed results of these surveys, were published in Earnings and Hours of Employees (Reference No. 6.40). Final estimates for October 1976 will be available shortly.

#### Surveys of Earnings and Hours, May 1974 to 1976

Surveys were conducted in May of the years 1974 to 1976 to obtain statistics of the distribution of earnings and hours of employees, and the composition of weekly earnings and hours for various categories of employees and for principal occupations. Results of the surveys published in Earnings and Hours of Employees, Distribution and Composition (Preliminary) (Reference No. 6.47) and Earnings and Hours of Employees, Distribution and Composition (Reference No. 6.52).

Weekly Earnings of Employees (Distribution) August 1975 and August 1976

In August 1975 and August 1976, a sample survey, based on the quarterly population survey, was conducted throughout Australia in order to obtain details of weekly earnings of wage and salary earners. Results were published in *Weekly Earnings of Employees* (Distribution) (Reference No. 6.51).
